Career & Internship Advising
We consult with students on strategies to gain experience in order to test career ideas, discover ways to gain new skills, and translate the value of their L&S degree to the world of work. We also assist with the “tools” of attaining experience such as: networking and internship/job search strategies, building a LinkedIn profile, BuckyNet navigation, resume/cover letter feedback, interviewing, and job/salary negotiation.

If you are not on campus, Skype/phone appointments are available. 
Appointments = 30 minutes
Drop-ins = 15-20 minutes & no appointment necessary

Jobs/Internship Database
BuckyNet is our password-protected interactive online system which connects students and employers. Through BuckyNet, you can search and apply for internships and full-time opportunities, post your resume, sign up for on-campus interviews and much more. Sign up at careers.ls.wisc.edu

For-Credit Courses
INTER-LS 210: Career Development Course, an interdisciplinary course that connects the liberal arts and sciences degree to academic and career preparation, practical internship/job application skills, goal-setting, critical thinking and reflection. More information in the Course Guide.

INTER-LS 260: Internship Course for Credit, an online course that is open to all students and is aimed at providing a framework for a reflective academic experience while doing an internship.

Day in the Field and Job Shadow Programs
These programs provide the opportunity for students to make site visits to employers to learn about internship and job opportunities. In the Day in the Field Program, a group of students meet with panels of professionals and tour the employer site. In the Job Shadow Program, individual students meet one-on-one with professionals (or via Skype), observe their jobs for a day, and learn first-hand about the organizational structure of an employer.
